Summary

Senior Software Engineer with 6+ years building high-performance, data-intensive platforms at scale. Specialized in React, TypeScript, and real-time systems using Kafka and SSE. Proven impact on large-scale retail systems handling 6,000+ daily users and INR 50+ Cr inventory, with strong focus on performance and system design.

Experience

- Reliance Jio Platforms** Jun 2024 – Present
Software Development Engineer - 2 (Senior Software Engineer) Navi Mumbai
 - Built inventory platform serving **1,300+ stores across 6 brands**, managing **INR 50+ Cr inventory** with **6,000+ daily users**
 - Reduced dashboard load time by **45%** using memoization and virtualization, enabling real-time analytics
 - Built **30+ reusable components** and standardized Redux architecture, reducing duplication by 30%
 - Mentored a **3-member frontend team** and drove code quality through reviews
 - Implemented **Docker-based CI/CD pipelines** for faster and reliable releases
- Reliance Jio (Client Role)** Dec 2023 – Jun 2024
Software Developer Mumbai
 - Contributed to early architecture and development of a large-scale inventory system
 - Built core modules for real-time retail data workflows using React and TypeScript
- Algonauts Advisory** Nov 2021 – Dec 2023
Senior Software Developer Mumbai
 - Built trading system processing **8K+ trades/day** with **99.5% uptime**
 - Designed system workflows and improved engagement by **25%** using ML recommendations
- Ugam Solutions** Jun 2019 – Nov 2021
Senior Analyst Thane
 - Delivered **15+ analytics platforms** for clients including CDC and Google Screenwise
 - Built dashboards and data tools reducing reporting time by **40%**

Projects

- AnyTrac RFID Platform**
 - Reduced scan time from **5 mins to 1 sec**, improving operational efficiency
 - Improved inventory accuracy from **75% to 98%** and reduced shrinkage by **40%**
 - Designed **Kafka-based event-driven architecture** for real-time inventory updates
- JVA Retail Video Analytics**
 - Built real-time dashboards processing camera stream data for retail insights
 - Integrated **Kafka pipelines** and implemented **SSE-based real-time alerts**
 - Designed ROI-based processing to convert video feeds into actionable analytics
- Reliance Foundation Scholarship Portal**
 - Built system handling **50K+ annual applications** with scalable backend architecture
 - Migrated legacy system to MERN stack improving scalability by **200%**
 - Developed interview workflows supporting concurrent evaluation processes

Skills

JavaScript, TypeScript, Python

React, Next.js, Redux, Node.js, Express

Kafka, Redis

MongoDB, PostgreSQL, MySQL

Docker, AWS, Azure DevOps, Git

Education

B.E. Computer Engineering, Vidyalankar Institute of Technology
